## DECODING THE PROJECT

The need for strengthening the social dimension of sustainable development and how SPL Coin is moving towards a more social and sustainable future.

SocialPolis Coin is a mature Blockchain solution to operate as a sophisticated alternative method in financing innovative Social Economy Development and Sustainability projects, providing trust and transparency. Sustainability comes as a top-tier priority as it aims to meet the needs of the present without compromising the capacity of future generations, guaranteeing the balance between economic growth, care for the environment and social well-being.

## Definition of Social Sustainability

“Social sustainability occurs when the formal and informal processes; systems; structures; and relationships actively support the capacity of current and future generations to create healthy and livable communities. Socially sustainable communities are equitable, diverse, connected and democratic and provide a good quality of life.” – WACOSS, Western Australia Council of Social Services.

Understanding the connections and relations among economic, social and environmental spheres is challenging looking them from each different point of view individually. Furthermore, there are several unanswered questions to whether certain social actions are more consistent with the concept of sustainable development than others. These actions include poverty reduction, social investment, and the building of secure and caring communities.

## Challenges

## Dimensions of Social Development

- Economic
- Social
- Environmental

## Actions of Social Sustainable Development include:

The United Nations Development Program [1994] described poverty as “the greatest threat to political stability, social cohesion and the environmental health of the planet” making it the primary objective of sustainable development.

Social investment is a prerequisite to economy development as a vibrant economy requires a healthy and educated workforce. Two major areas of social investment are health and education.

Within a sustainably developing community, each member is a caretaker of each other's welfare – much as individuals and all sectors are seen as stewards of environment. The base of a safe and caring community is the citizen

## 7 Reasons towards Social Development Goals

- 1 Further Poverty Reduction
- 2 Reduction of children mortality
- 3 Elimination of children marriage
- 4 Affordable, reliable, and modern energy for all
- 5 Restriction of economic losses due to disasters
- 6 Decline of global hunger
- 7 Climate change action is imperative

## SocialPolis Coin Project's Social Impact

SocialPolis Coin (SPL Coin) aims to become the world's safe-haven cryptocurrency that enables a technological disruption in the Social Economy, Solidarity & Sustainable Development Economy sectors.

The introduction of SPL cryptocoin will boost social and solidarity economies globally, by reducing the financial cost of this financial sector, reducing the financial cost of transactions between participants in a well-defined “ecosystem” of coops and NGOs and providing free availability of the basic tools to this sector to develop secure applications that will distribute the benefits of the technology to all its members.
